**I. PROGRAM OBJECTIVES:** Describe what the program is designed to achieve and explain how it is structured in order to accomplish the objectives.

The purpose of the program is to prepare registered nurses (RN) to provide evidence-based generalist nursing care for diverse individuals, families, and populations in a variety of ever changing health care environments. The program focuses on the acquisition of core knowledge, skills, ethical values, and critical reasoning that prepare the learner to assume the responsibilities of a professional nurse and can provide the foundation for nursing leadership roles and graduate education.

Graduates of the program may provide biographically relevant generalist nursing care to patients, families, groups, and communities across the continuum of healthcare settings. The baccalaureate degree for the registered nurse (RN) prepares the RN for a broader scope of practice and provides a foundation for career mobility into leadership positions and graduate nursing education.

**II. PROGRAM STRUCTURE:** List all courses in the program. Indicate course name, number, and number of credit hours or clock hours for each course.
